

New in FARM version 8157, 8220 and 8232

Together with our clients we make our programs even better!

Regularly we receive wishes and suggestions from our clients. We are very pleased with that: Our clients do know how we can improve our programs.

To find the modifications in the program, you can follow the numbers from the menu options. Don't you have numbers in the menu? Then go to: 'Miscellaneous, Settings, General' and select 'Numbers in menu'. When you restart the program, the numbers are visible.

Software Upgrades

Changes for breeding organization TopigsNorsvin and HYPOR

- ✓ When admin animal no. > 999999, then for these animals a non used animal no. < 999999 is used for exchange in EDI-pigs.
- ✓ Internal transferred rearing animals get value chipno. Value = ????? in the exchange file when they have no chipnumber.

Changes for starting Pigvision MSR from FARM (standalone)

- ✓ Starting Pigvision MSR from FARM is possible again.
Via Menu 8.21 PigVision access or with button .

Changes for secure data from and to FARM (standalone)

- ✓ In connection with the tightened data traffic security, sending data from FARM is now possible again.
I.a. Send to Benchmark (farm comparison)

Questions about these modifications ?

If you have any questions, please contact our: support@pigvision.com or call 31 (0) 570-664131 or your distributor. We are happy to support!
